FOUNDATION POLICY DOCUMENT

Cookie Policy

Website cookie notice for twinlink.eu

This document explains how Foundation twinlink.eu may use cookies and similar technologies on the twinlink.eu website, how visitors can manage their preferences, and how cookies relate to privacy and website functionality.

Controller	Foundation twinlink.eu
Registered address	Serpelingstraat 13, 7559 HG Hengelo, the Netherlands
Registration details	KVK 99953625 | RSIN 869202042 | ANBI application pending
Document status	Website cookie policy March 2026

1. Introduction

twinlink.eu is committed to transparency in its use of cookies and similar technologies. This Cookie Policy explains what cookies are, which categories may be used on the twinlink.eu website, why they are used, and what choices visitors have. It should be read together with the twinlink.eu Privacy Policy.

This policy is written for a Dutch non-profit organisation operating within the European Union. The use of cookies and related technologies is assessed primarily under Regulation (EU) 2016/679 (the General Data Protection Regulation or GDPR), the Dutch GDPR Implementation Act where applicable, and the rules on cookies and electronic communications that apply to website operators in the Netherlands and the European Union.

2. Scope of this Policy

This policy applies to the twinlink.eu website and related online services managed by Foundation twinlink.eu. It covers cookies, pixels, tags, scripts, local storage and similar technologies that may be placed or accessed when you visit the site, interact with embedded content, submit forms, or manage your preferences through a cookie banner or consent platform.

3. Who is responsible for cookie use on the website?

Foundation twinlink.eu is the controller for the cookie-related processing described in this policy insofar as it determines the purposes and means of that processing.

Organisation	Address	Company register	Privacy contact
Foundation twinlink.eu	Serpelingstraat 13, 7559 HG Hengelo, the Netherlands	KVK 99953625	info@twinlink.eu

4. What cookies are

Cookies are small text files or similar data elements stored on your device when you visit a website. They can help a website function properly, remember choices, maintain secure sessions, measure traffic, and support embedded features. Some cookies are deleted when you close your browser, while others remain for a longer period unless you delete them.

The term 'cookies' in this policy is used broadly to include comparable technologies such as local storage, session identifiers, pixels, tags and scripts where they perform a similar function.

5. Why cookies may be used and on what basis

twinlink.eu only uses cookies or similar technologies where there is an appropriate legal basis. The main purposes and legal bases are summarised below.

Purpose	Examples	Typical legal basis
Website operation	Load balancing, session continuity, consent storage, security functions	Legitimate interests; legal obligations where applicable
Preference management	Language choice, cookie settings, accessibility preferences	Legitimate interests; consent where required
Analytics and improvement	Aggregated statistics, page performance, user journeys	Consent where cookies are required; legitimate interests for strictly necessary measurements
Embedded services	Videos, maps, forms, social media or third-party widgets	Consent for non-essential cookies; legitimate interests for necessary delivery
Compliance and evidence	Recording consent signals, audit trails, security monitoring	Legal obligations; legitimate interests

6. Categories of cookies that may be used

- Strictly necessary cookies, which are required for basic website operation, security, consent preference storage, load balancing, or fraud prevention.

- Preference cookies, which remember settings such as language, region, accessibility options, or interface choices.
- Analytics cookies, which help understand how visitors use the website so that content, navigation and performance can be improved.
- Embedded-content or third-party cookies, which may be set when pages include external services such as videos, maps, forms, social-media feeds or comparable website integrations.

Not every category will necessarily be active at all times. The actual cookies in use depend on the production configuration of the website and the services enabled on individual pages.

7. Strictly necessary cookies

Certain cookies may be required for the secure and technically proper operation of the website. These may include cookies that preserve a browsing session, distribute traffic across infrastructure, remember a consent choice, or protect online forms against misuse. Because such cookies are necessary for the provision of the service requested by the visitor, they may be used without prior consent where the law allows.

8. Analytics cookies

twinlink.eu may use privacy-conscious analytics tools to understand website traffic, popular pages, technical performance and general usage patterns. Analytics cookies will only be activated where consent is required and has been given.

Where analytics are enabled, twinlink.eu aims to minimise the processing of personal data, for example by limiting retention periods, reducing direct identifiers where possible, and restricting access to analytics results to persons who need them for website management or governance purposes.

9. Third-party cookies and embedded content

Some pages may contain embedded content or links to external services, such as social media pages, maps, videos, forms or external platforms. If such services set cookies through the twinlink.eu website, those cookies are governed by the third party's own terms and privacy notices in addition to this policy.

Where third-party cookies are not strictly necessary, twinlink.eu should ask for consent before such technologies are loaded. If you do not consent, the embedded service may remain blocked until you choose to activate it.

10. How long cookies are kept

Cookie duration depends on the purpose of the cookie. Session cookies are normally deleted when you close your browser. Persistent cookies remain on your device until they expire or are deleted. As a general rule, twinlink.eu should aim for proportionate retention periods and should not keep non-essential cookies longer than necessary for the stated purpose.

Category	Indicative retention approach
Session cookies	Deleted at the end of the browsing session or shortly thereafter.
Consent and preference cookies	Kept for a limited period so the website can remember your choices.
Analytics cookies	Retention should be limited and aligned with the analytics configuration in production.

Category	Indicative retention approach
Third-party cookies	Retention depends on the external provider and should be disclosed where used.

11. Managing your cookie preferences

You can manage cookies in several ways: through the cookie banner or preference centre on the website, through your browser settings, or by deleting stored cookies from your device. Most browsers allow you to block or delete cookies, although doing so may affect the functionality of certain website features.

Refusing non-essential cookies should not prevent access to the public informational parts of the website. You can also withdraw previously given consent at any time via the relevant cookie settings tool made available on the site.

12. International transfers, changes and contact

If twinlink.eu uses service providers to support hosting, analytics, security, consent management or embedded website functionality, those providers may process limited technical data on behalf of twinlink.eu. Where personal data is transferred outside the European Economic Area, twinlink.eu should ensure that an appropriate legal safeguard is in place.

twinlink.eu may update this Cookie Policy from time to time to reflect changes in law, technology, website functionality or service providers. The most recent version should always be available on the website and should indicate the date of last update.

For questions about this Cookie Policy or the use of cookies on the twinlink.eu website, please contact Foundation twinlink.eu at info@twinlink.eu.
